I Speak for the Water

This week I will be out of the office more than once, getting my hands wet (figuratively speaking) among water professionals at conferences, symposiums, and a tech fair. My excursion begins with a dialog at UCLA that is bringing together water experts from the US and Australia, with a primary focus on meeting future demand. And, it seems that the California-centric organizers mostly mean our extremely dry Southwest when they use the term. Water efficiency in warmer dryer areas...[continue reading](#)

Ductile Iron Pipe

Ductile iron pipe recently earned a Gold Level certification for sustainability from the Institute for Market Transformation to Sustainability (MTS). Called Sustainable Materials Rating Technology ("SMaRT"), the rating system requires a product to have multiple environmental, social, and economic... [Learn More](#)

Flowrox Announces New Technology to Manage Pipeline Scaling

(Orlando, Florida) — Flowrox, a global leader in heavy-duty industrial valve manufacturing and service, is introducing the Flowrox Scaling Watch, a new product designed for the precise measurement of scale in pipelines and other fluid control...[continue reading](#)

West Virginia Chemical Spill Declared Federal Disaster

Al Jazeera and wire services January 9, 2014. West Virginia schools and restaurants closed, grocery stores sold out of bottled water, and state legislators who had just started their session canceled the day's business after a chemical spill in the Elk River in Charleston shut down much of the city and surrounding counties even as the cause and extent of the incident remained unclear. The warnings affect around 300,000 people. There have been...[continue reading](#)

Flood Observations And Forecasts From Schneider Electric Keep Flood Areas Alert

January 9, 2013 – Schneider Electric announced the release of its flood observations and forecasts, an addition to its industry-leading MxVision WeatherSentry® Online system. The solution provides up to the minute intelligence when assets may be in danger due to high or fast water...[continue reading](#)
